

5 O'CLOCK SPECIAL. WILL NOT TELL THEIR ILLS.

Census Men Get Few Answers to the Obnoxious Queries.

Nearly 400,000 Names Already Recorded—Tired-Out Enumerators.

The work of taking the census of this big town goes merrily on. The stupendous task of getting down on paper the names and pedigrees of the entire population of this fair to be a grand success, and the indications are that by June 10 there will be but a few stragglers, sailors and non-residents—who will not have been subjected to the multifarious interrogatories of the name-hunting young men.

Fully 100 persons were early at the doors of the Census Office, at 135 Eighth street, this morning. The stood were crowded, but when the door swung open the crowd rushed in, and a loud and unanimous request for blanks and information fell like a shower upon a solitary youth's attention, and he made haste to supply the demand.

Mr. Calkins, the arbitrary and formidable Chairman of the bureau of information and of the distribution of census blanks, arrived some minutes later.

Mr. Murray, the Supervisor, was the next important personage to appear, and he, too, made all possible haste to his desk and began the transaction of the day's business. He was fatigued and tired, and his face beamed with smiles as he surveyed the long bundles of blanks pertaining to his administration that filled the room.

The postal cards that came from the enumerators, showing the work accomplished yesterday, were spread out on the tables, and Mr. Calkins managed to find an opportunity between answering questions to roughly compute the total of the population so far enumerated.

The computation of Monday's work had been completed, and the labor of getting yesterday's enumerations into shape was begun. Mr. Murray, the Supervisor, who had been interviewed by the young men on Sunday, he could, or would, have no objection to being interviewed by the young men on Monday's work represented 157,000 enumerations.

Mr. Murray's lips had become sealed by instructions from Supt. Porter, who issued this manifesto, which, however, had not officially reached the Supervisor when an Evening World reporter called this morning.

The thirteenth section of the Census act of March 1, 1900, makes it a misdemeanor punishable by a fine of \$500, for any supervisor or enumerator to conceal the name of any person authorized to receive the same any information asked by him in the performance of his duty. No tabulations whatever of the returns must be made by the supervisor, and no return estimates given.

The newspapers had been the medium through which the census men secured their instructions, and he proceeded at once to carry them into effect.

There was a dearth of increase of work done yesterday over that of Monday by the enumerators. A much larger number of postal cards came through the mail to the Census office, and a superficial inspection of the reports already received showed that fully 300,000 persons were recorded.

Uncle Sam's blanks. The complaints against persons refusing to answer the eight objectionable questions of the schedule continued to pour into the office, and the Census men were ordered to stop taking them. It was understood that the Census men were to be allowed to take them at once, and I feel in my bones that I continue the work, and I will be a coroner's case.

The young man's portfolio was taken from him, his device was communicated to Chief Murray and he was allowed to go. A stout, ruddy-faced man, who said he found taking census in the North Assembly District a pleasant task, asked for the acceptance of the Census men, and he said that his shoe store imperatively needed his personal attention. He departed in peace.

DID MURDERER GO FREE?

Hot Blood Between Assistant District-Attorneys Brings Out Queer Tales.

Col. Dawson Hints That Judge Bedford Suppressed Evidence.

There is a peck of trouble brewing in the District-Attorney's office. That fiery orator and impulsive Southern, Col. Andrew H. Dawson, one of Col. Pettibone's assistants, is on the warpath, with his meteorological knife whetted for the scalp of ex-Judge Gunning S. Bedford, another of the seven Assistant District-Attorneys.

Col. Dawson vows that he don't propose to remain inactive and see injustice and reflections perpetrated and cast on the administration and fair name of District-Attorney Fellows. For the past two years he has been an eye-witness of a most deplorable occurrence, in which Assistant District-Attorney Bedford was implicated in connection with a recent trial of murder.

Col. Dawson is not alone in possession of the views he expresses regarding the conduct of the trial in question. Deputy Coroner Weston, while more diplomatic and gentle in the enunciation of his ideas regarding the case, maintains a pronounced opinion on the same subject.

Dr. Weston made an autopsy on the body of the murdered man, and he has been working for several days how it came to pass that his valuable testimony was never heard by the jury.

After the structures and innuendoes flung by the two gentlemen against Mr. Bedford are quite serious, and unless they are rectified, positive and tangible facts, somebody is liable to get hurt.

The original trouble is found in the trial of Gerardo Campobasso, an Italian, for the murder of Ricci, a fellow-countryman, in his shop, One hundred and seventy-first street and Webster avenue, on the evening of Feb. 2. According to one version of the story, the murdered man had been playing cards with his lawyer, when a dispute arose, and the latter drew a knife, and the murderer, Ricci, succeeded in getting the lawyer, and retired to a sofa for a short nap.

While the lawyer was sleeping, the murderer, Ricci, succeeded in getting the lawyer, and retired to a sofa for a short nap. The lawyer, Ricci, succeeded in getting the lawyer, and retired to a sofa for a short nap.

Another account on which the defense at the trial was based, stated that Ricci had been causing a disturbance in Campobasso's shop, and the latter put him out. Returning, he found Ricci in his shop, and Ricci tried to gain admittance into the room for the alleged purpose of killing Campobasso.

It is a fact that Campobasso died from this city and was subsequently carried to the morgue. He was placed on trial for murder in the first degree before Judge Fitzgerald, in Part I. of the Criminal Court, on the 10th of March.

Col. Dawson said that it is a fact that Campobasso died from this city and was subsequently carried to the morgue. He was placed on trial for murder in the first degree before Judge Fitzgerald, in Part I. of the Criminal Court, on the 10th of March.

STOCK REPORTS.

Bulls Again Get the Market in Their Control.

Though Bears Jump on Rock Island and Force It Down.

Rumors Afloat of Another Big Railroad Deal.

ULLS had their way at the Stock Exchange. There were no wild fluctuations and very little excitement, but those operating for higher prices appeared to have the market under control once more.

The feverishness in the Trusts is not so pronounced and this in itself is of the greatest value to the bull leaders.

The announcement from Washington that the House will take up the silver question on Friday or Saturday, however, is the biggest bull card.

McKibbin is quoted as saying that the debate will not run over two or three days. It was announced that "Sugar Trust" has just advanced refined sugar 1-10c on hard sugar and 3-10c on soft refined.

This makes advance of 9-10c on soft refined, while raws have risen but 1/2. The Trust is coming money and has about 100,000 tons of raw sugar on hand of low cost.

In the afternoon the bears jumped on Rock Island and forced the stock down 2 points on a report that the annual statement would be a great disappointment.

When the report came it was found that the road had earned gross for the year, \$17,000,000, net, \$5,100,000, and a surplus over all charges and dividends of \$49,550.

Last year there was a small deficit, so that the bears did not have it their own way after all.

The break in Rock Island had little effect on the general list. Sugar and Union Pacific rallied smartly and everything else moved up in sympathy with them.

Director Magoun, of the Atchafalaya, throws out intimations of another "big deal" which, if true, will be a great disappointment to the Atchafalaya-San Francisco combination just formed.

It is understood that Seligman & Co. have agreed to furnish the Mexican Government with a loan of \$2,000,000 sterling to cancel some of the Government's indebtedness.

It is further said that the Mexican Central Railroad is to receive a subsidy of \$1,000,000, which the Company will use to take up the priority and a large amount of the 4 per cent. loan.
